

## **CERTIFIED NURSING ASSISTANT**

The Certified Nursing Assistant training program is designed to prepare you to provide quality care to clients in both private settings and health care facilities. Successful completion of the course (theory, lab and clinical) meets the requirements to be eligible to take the State Competency Evaluation Exam for CNA.

Master the ability to:

- ❖ Assist clients in attaining and maintaining functional independence
- ❖ Form relationships and communicate/interact with clients, families and other health team members effectively.
- ❖ Demonstrate an understanding of client's emotional, social, and physical needs through sensitive interactions and behaviors.
- ❖ Understand and support client rights.
- ❖ Demonstrate observational and documentation skills needed in the assessment of client's health and well-being.
